

Kyle Classic Program

Retirement Benefits for Classic Reclosers

Cooper Power Systems Kyle single-phase and three-phase reclosers are among the most reliable devices offered to the electric utility industry — so reliable, in fact, many customers have reclosers on their system well over 50 years. To promote refurbishment of the grid, Cooper Power Systems offers an incentive program for customers to retire Kyle reclosers with more than a quarter century of service and purchase new Kyle reclosers.

Below are the new additions to stimulate improving reliability for the electric grid:

- Credits can now be applied towards single-phase oil-interrupting hydraulic reclosers.
- Increased award prices for vacuum reclosers and Form 6 controls.
- Select non-Cooper Power Systems reclosers are included in the program.

The Kyle Classic program recognizes the value of veteran Kyle single-phase reclosers, 25 years old or older, by offering between \$100 and \$250 credit toward the purchase of new vacuum or oil single-phase reclosers. Retire certain reclosers not manufactured by Cooper as well to receive a similar credit. Refer to the tables on the back of this bulletin for a list of qualified reclosers.

Send the serial number plate and a completed B280-05022 scrap report-credit request form to the Cooper Power Systems Customer Support Center.

Form 6 recloser controls are eligible to be purchased with Kyle Classic credits earned from retirement of older controls under the terms and conditions of the Kyle Classic program. Eligible controls include all Form 1, Form 2, Form 3, Form 3A, Form 4, Form 4A, Form 4C, Form 5, FXA, and FXB controls of any age. Each retired control earns a \$400 credit value towards purchase of a Form 6 control.

Program
Description:

Kyle Classic
Program Controls:

Kyle Classic Program

Retire your legacy recloser or control for future purchase credits.

Kyle Classic Program Procedures

1. Remove serial number nameplates from your scrapped products that are eligible for this program.
2. Completely fill out a copy of Kyle Classic Program Scrap Report and Credit Request, Form B280-05022.
3. Send the serial number nameplates with the completed Scrap Report and Credit Request, B280-05022, to the Cooper Power Systems Customer Support Center.
4. Customer Support Center issues a certificate or credits a pending sales order.
5. Submit certificates to the Cooper Power Systems Customer Support Center at the time an order is placed.

Redeem Your Credits Now or Later

The new credit values and product types are listed in the tables below. Simply select the scrapped recloser or control model and the new recloser or control required to determine the Kyle Classic value.

Kyle Recloser Scrapped	Purchase Credit Value					
	H, 4H	V4H	L, E, 4E	V4L, V4E, NOVA ¹	6H	V6H

Program Regulations

Kyle Classic credits are applied directly toward a pending sales order or a credit certificate can be issued for future usage. Kyle Classic program regulations limit credit for eligible products to orders dated July 1, 2009, or later; Kyle Classic program discounts cannot be applied to previous orders or be combined with other discounts. All credits must be redeemed prior to order shipment. Orders which have shipped are not eligible for application of Kyle credits. Credit certificates are valid for one year.
