

When Reliability Counts, You Need More Choices

Customizable protection solutions – the right relays for demanding applications.

P R O T E C T I V E R E L A Y S

A Complete Line of Relays from the Experts in Power System Reliability

Cooper Power Systems is the leading provider of electrical distribution solutions worldwide – delivering automation and integration products that protect, connect, and improve the entire power system. Cooper's Edison® Idea™ and IdeaPLUS™ relays offer complete, customizable protection for virtually any application.

Customized for Greater Reliability and Versatility

- Cooper's exclusive Idea Workbench™, Virtual Test Set™, and Relay Replay™ software functionality provides you with tools to enhance and customize your protection schemes. Our in-house experts are a resource to ensure that you get the comprehensive solution you need to deliver reliable power to your customers, every day.

More Options for a Better Solution

- The Edison Idea family of relays offers inherent communications options that improve reliability. Options include serial fiber, RS232 or RS485 port and dual Ethernet ports. One connection provides engineering access, SCADA and automation. The IdeaPLUS relay has additional features offering you added convenience, flexibility, and safety.

Versatile Relay Platform – Ideal for Multiple Applications

- Edison Idea and IdeaPLUS relays are ideally suited for feeder protection, transformer protection, line protection, pad-mounted switchgear, and capacitor protection. Cooper's capacitor relays have features and functions not found in other capacitor bank protective relays. The following relay models provide you with complete system protection: iDP-210 Feeder Protection Relay, iTP-100 Line Distance Relay, iXP-420 Transformer Protection Relay, iCP-191 Fuseless Capacitor Bank Protection Relay, iCP-440 Capacitor Bank Protection Relay, iCP-630 Capacitor Bank Protection Relay, and iCP-640 Capacitor Bank Protection Relay.

Expert Support for a Successful Outcome

- Cooper has an in-house team of relay engineers with years of experience in developing relay schemes for highly customized applications. Their recommendations and support ensure that you will have the right solution where and when you need it.
